## NEW TECHNOLOGY

### Nano Glaze

Nano antibacterial self-cleaning glaze ware is the use of special coating technology , nano liquid glass glaze uniformly on the ceramic surface after high temperature treatment, increasing brightness but also has clubs. Nano glaze kills an almost unprecedented 95 % of germs. Antibacterial, durable, safe.

### Ultra Slim Soft Closing Seat Covers

Easy installation, ultra slim soft close , adjustable hinge fixing, very easy to be cleaned.

### Rimless flush

Incorporating an advanced rimless design, The Rimless allows water to circulate along the entire perimeter of the pan. This technology enables a higher level of hygiene as well as the advantage of easier cleaning.

### Rimless Technonlogy

Conventional toilet designs distribute the water through holes in the rim, so that water falls straight down towards the outlet, which can miss residue. Due to its rimless design, The Rimless sends water raound the upper part of the bowl's perimeter, moving in a circular motion towards the outlet, resulting in a cleaner and more hygienic surface.

### Higher Efficiency

Our rimless toilet is hygienically optimal when compared with conventional toilets.  
Attractive and timeless design.  
Ideal water flow for maximum flushing effect.

## Rimless flush

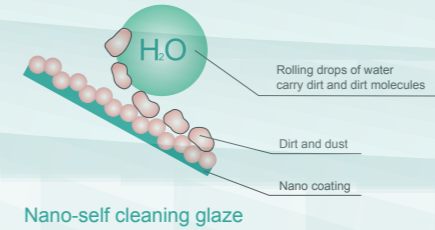

Ultra Slim soft closing seat

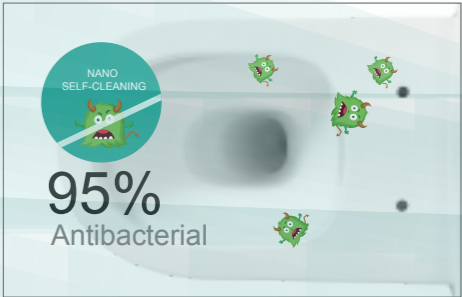

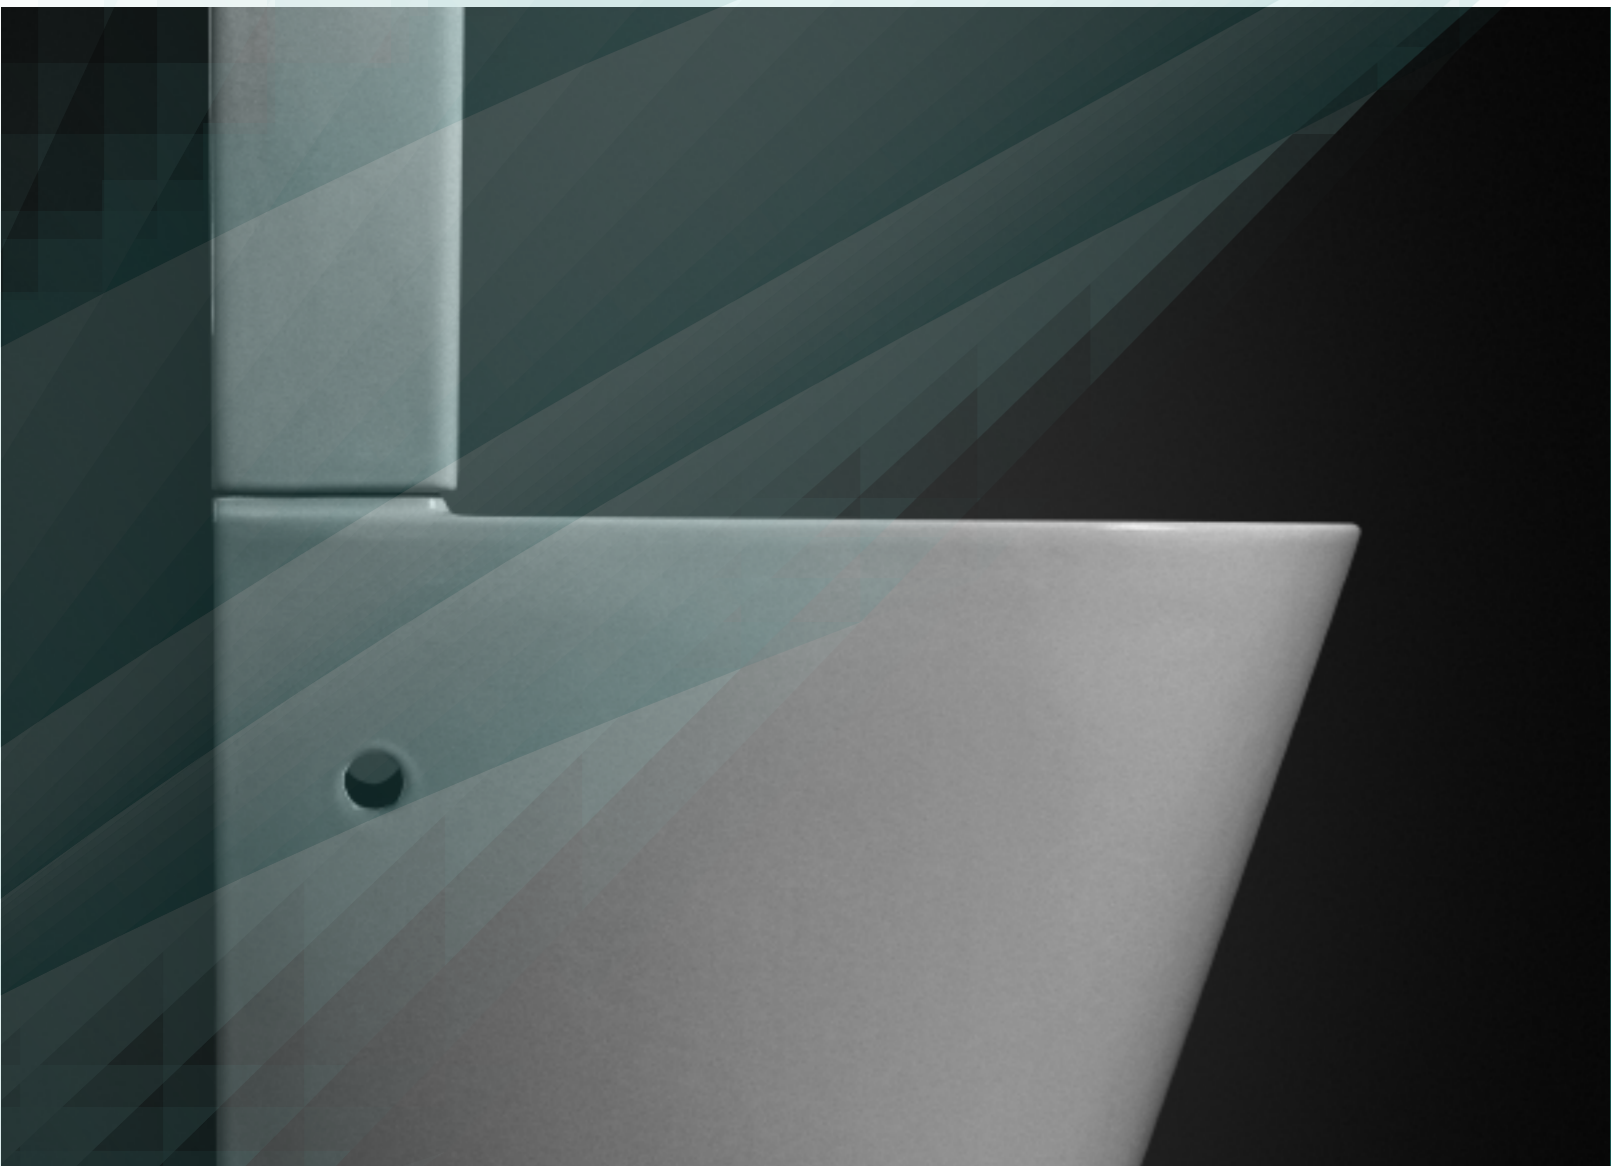

Easy installation,ultra slim soft close , adjustable hinge fixing, very easy to be cleaned.

Physical damping design, to ensure that the seat slowly landing, to avoid noise more clean.
